1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 10/28/04 has been entered.

2. The abstract of the disclosure is objected to because it is too long and needs to be shortened to 150 words or less. Correction is required. See MPEP § 608.01(b).

3. The disclosure is objected to because of the following informalities: the reference number "11" has been used for two different elements. Page 9 lines 22,24 (for example) refer to "11" as a "local controller. Page 23 line 26, page 24 line 24 refer to "11" as a "card reader/writer".

Appropriate correction is required.

4. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

5. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: 15 as seen on page 10, line 4 (for example) is not in the drawings. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to

Art Unit: 2876

the Office action to avoid abandonment of the application. Any amended replacement-drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

6. Applicant requests interference proceedings between the current application and US Patent number 6,098,879. Applicant has requested within 1 year of the issue of the Patent interfering claims and proposes a count. Applicant provides a claim chart explaining the correspondence between the current application claim language and support in the current specification for the claim language. Current claims 19-27,28-35,36 are identical to Patent claims 1-9,18-25,27 respectively. The examiner concurs with this analysis.

7. However, applicant has not provided a detailed explanation why applicant will prevail on priority as required by 37 CFR 41.202(a) effective September 13, 2004. It is suggested that applicant review 37 CFR 41.202(a) to ensure that the current rules regarding interference proceedings are closely followed.

8. The examiner does not contest the applicant's claim for interference, only that the current "rules" of practice are not yet met.

9. Claims 19-36 remain allowed for the same reasons as previously set forth.

10. This application is in condition for allowance except for the formal matters as seen above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
